CENTAUREA MARGUERITE.

SWEET MARGUERITE.

The charm of this flower is its airy grace, silvery sheen and subtle perfume. The flowers are exquisitely formed, resembling filigree silver work, on long stems. A charming flower for all manner of decorations, for bouquet, vases, or corsage wear. The flowers are very durable and last for days when cut without wilting, making it the best cut flower we have in Summer. Of very easy growth and profuse with bloom. Makes a fine pot plant. **From Nature's mystic storehouse,
Comes bounteous Fruits and wondrous Flowers.**

The end of our glorious Summers are saddened by the taking away of our fond flowers, one by one. I watched the Autumn leaves turn and fall; dropping so softly, like tiny coverlets. They swirled in the north wind, they rustled as we walked; but they are all still now, covering the dear wild flowers in their sleep. But even now, as I write, the Star of Bethlehem is shining bright; following close comes the birth of the new year; and as the sun moves toward the Summer solstice all nature begins to stir, and the resurrection of plant-life begins. Our regrets give way to hope; we look up, we look ahead—and down through the vista of Spring-time, we see the troop of nature's weanlings marching by. We begin to plan, and revel in sweet anticipation of being with our flowers once more; and perchance we will make some new acquaintances with bright and pretty faces—when lo! the time to act has come, for Spring-time, "soft, melodious Spring-time," is here once more.

A STATEMENT.

I am in no way whatsoever connected with any other seed or floral establishment doing business at Floral Park. My place of business is located one-half mile from the station on the Jericho Road.

THE EDELWEISS.—THE ALPINE SNOWFLOWER.

**As white as snow—
But lasts forever.**

No other flower in the whole universe—not even the rarest orchid has cost so many lives as this chaste little Alpine beauty. A recent publication states that "scores of lives" are lost annually by venturesome tourists in their efforts to obtain it. It is well known that travelers circling the globe will stop at the mountains of Switzerland and climb to almost inaccessible heights to be the proud possessors of the precious little treasure. It requires patience, courage, strength, endurance, and a perilous task it is. No wonder, therefore, that it is prized so highly, that the ladies ornate their hats with it as trophies; no wonder that gathering the plants in their native home by crafty guides, who know their value, is now prohibited for fear of their extermination. Like the wonderful Rose of Jericho from Syria and the Resurrection plant from Mexico, the EDELWEISS is the natural curiosity, for one may say the "flower never dies," as it remains as white as the snow from which it sprung, and soft and velvety even longer than human life.

There is also some romance connected with it, it being an ancient local custom for the Tyrolean lover to present his affianced as an engagement flower, one that he has gathered himself from among the snow-clad rocks, and the higher the altitude the more cherished it is. Certainly they are chaste and beautiful, as white as snow and as soft as velvet, growing sometimes 30 on one plant, with grayish white foliage, spreading Rosette. Naturally as hard as a rock, they grow in any way, on sandy moist soil, preferably gritty and well drained, or on raised rockwork, and even as a border plant, in chalky open soil lasting for years. In beauty, it would certainly prove a wonderful attraction, aside from its intrinsic value.

It is well known that owing to the scarcity of EDELWEISS flowers and the great demand for them, imitations made of white cloth, etc., are palmed off on credulous and unsophisticated travelers. As a "fad" for the coming Summer, I offer the dried flowers (especially imported for this purpose by me) to be used as a mountain symbol. They can be worn on the hat, coat or waist.

Three very fine perfect flowers sent for 10c. by mail. Fresh Edelweiss Seed, Pkt. 10c. Plants of Edelweiss, 15c. each; 2 for 25c.

Yours very truly,

NYMPHÆA ZANZIBARENSIS.

Red, White and Blue Ever-blooming Water Lilies.

The growth of these three African Water Lilies is so wonderful and rapid that seeds sown in February or March will make nice little plants by June, and if planted out then will begin blooming in July and continue to produce a profusion of flowers every day until frozen up in the fall. They are as easily grown from seeds as are the Balsams or Asters, and are best treated as annuals.

To Grow Them from Seed.—In February or March take old tea-cups and fill them about two-thirds full with fine, rich garden soil, press it down firm and scatter the seeds on the surface, half a packet or a full packet to each cup, covering them to a depth of an eighth or a quarter of an inch with clean sand. Fill up carefully with water, so as not to disturb the seeds, and place where they will keep at a temperature of 70 to 80 degrees, until they germinate, which will be from six to fifteen days. After the plants have made leaves a quarter of an inch across, transplant them to two-inch pots, or other cups. Set one plant to each pot or cup, press the soil down firm, and set them in a pan of water deep enough to cover the plants about an inch. They can be kept in greenhouse, hot bed or warm sunny window in the house until time to plant out in the tubs. Do not put them in the open air until the weather has become quite warm, but they may be planted out several weeks earlier if the tubs are covered with glass.

Pkt., 50 seeds, Red, White and Blue, Mixed, 5c.

A GRAND PLANT.

NEW BROWALLIA GRANDIFLORA.

While in France last summer this plant was highly recommended to me. It came from such a reliable source I had no hesitation in cataloguing it last spring. It has proved to be a remarkably good thing—every one who has grown it is delighted. It is a perennial, growing year after year. Will bloom equally as well indoors as out; after blooming all summer outside, cut it back and pot it. After a little check it will begin to bloom and continue in flower all winter long; it can then be set outside. For a single pot plant, for beds or borders, it is grand and as a basket plant nothing surpasses it. Flowers often measure over an inch across, of a deep violet blue, with distinct white eye.

MARVEL OF PERU (Mirabilis)—The improved Four O'clock is one of our most desirable plants. It grows in any soil and under any treatment. Planted like peas, they soon make a row of plants smothered with flowers, which have the strange habit of remaining closed until exactly 4 o'clock, when they burst out in their glory. For planting where other flowers will not grow, and ease of cultivation, nothing equals them. The roots are hardy and perennial, growing from year to year. They can also be wintered in the cellar.

MRS. THOS. W. LAWSON CARNATION.

The \$30,000.00 "Lawson Pink."

One year ago the stock of this Carnation wonder was sold to Mr. Thos. W. Lawson (Banker), of Boston, for \$30,000. For the past year the flowers have been sent to every large city of the Union, and have attracted immense crowds of admiring people. It has been seen at numerous Flower Shows throughout the country, and no flower has ever created the sensation and became so well known in so short a time. **The flowers are mammoth, often $4\frac{1}{2}$ inches across, the calyx is firm and never bursts, holding the immense flower like a beautiful emerald chalice of exquisite workmanship. The stems are often $2\frac{1}{2}$ to 3 feet long, holding the flower most gracefully without effort. The color is a deep rich scarlet pink. The petals are beautifully frilled with fringed edges.**

At this time (December 10th) no illustration is prepared small enough to use in my catalogue. But the Carnation is too well known to suffer on that account. My plants (like all others) that are of the true stock) come from the original stock of Mr. Thos. W. Lawson. They are sent to me on February 1st, they will have to be grown two or three weeks to be fit to send out, and I hope to begin to send out by February 20th, not later than March 1st. All orders booked and sent out promptly February 20th. I don't know what others are going to sell this plant for, but I am determined to give my customers a chance to buy it as low as the lowest.

Plants. 25c. each; 5 for \$1.00. Special prices on larger Mrs. Thos. W. Lawson Carnation quantities.

THREE MORE NEW 1900 CARNATIONS.

This seems to be "Carnation Year" with a vengeance: **Lawson, Olympia, Marquis and Ethel Crocker.** Were any of the other three charmers away we would go daft over any one of the four; as it is, I offer you **all** the wonders of the year. They are without doubt the most remarkable carnations ever seen.

Now these varieties were **all** raised, and are being vouched for and sent out by the most expert and reliable men in the business in this country, and they well know the merits of all carnations grown.

OLYMPIA.

The queen of Flakes: snow white, lightly penciled scarlet; less red in it than in Mrs. Bradt, and produces 28% more flowers. The largest variety ever introduced,

20c. each; 3 for 50c.

THE MARQUIS.

True pink, soft and rich; form exceptionally perfect, of the very largest size; stems strong, 2 to 3 feet; fragrant; keeps well; very free; a continuous bloomer.

20c. each; 3 for 50c.

ETHEL CROCKER.

Color: A deeper, brighter Mrs. Joost; pure pink.

Calyx: Strong.

Stem: 24 to 30 inches; strong and stiff but not ungraceful.

Freedom: Will produce more long-stemmed, full-sized blooms than any variety grown to-day.

Size: 3 to $3\frac{1}{4}$ inches.

Fragrance: Clove-like.

Constitution: Strong and healthy.

Notwithstanding the fact that there were other pink carnations in sight, we were very much impressed with the value of Ethel Crocker, as seen growing. **20c. each; 3 for 50c.**

One each of the four new Carnations, Lawson, Olympia, The Marquis and Ethel Crocker, for 70c.

**OLYMPIA
CARNATION.**

PRIZE CARNATION SEED.

Saved from the finest named varieties; artificially fertilized by hand. I have made special arrangements to have this seed raised for me by a carnation specialist having long experience and especial training. Some of the seed has the same blood as the **Lawson Pink**, all of it is from the best large flowered varieties. All this seed is raised and ripened under glass. Pkt. 25 seeds, **25c.**

A great favorite because it blooms so quick after sowing the seed; four months. Flowers large, colors are bright and varied, with that **delicious, refreshing clove fragrance** that makes all Carnations so much loved. Colors are dazzling **red, soft pink, white, mottled and variegated.** Carnations are now one of the most sought for flowers in the New York market, and the seed of this variety will produce flowers in a short time as fine as many grown in the Green Houses, and at very much less cost. The plants succeed alike in the open garden or in pots. Seeds sown early in the year will give an abundance of flowers in July. Sown in May and kept pinned back, you will have fine flowers late in the fall until checked by hard frosts. Sown in the autumn, the flowers will be in full bloom early in the spring. Thus by planting at different seasons, flowers can be had all the year around.

Pkt., finest quality, 100 seeds, **5c.**

NEW DWARF MARGARET CARNATION.

Like its parent, the Margaret, this Carnation **blooms in four months from sowing**, but is as much in advance of the type as the new French Cammas are ahead of the old "Indian Shot." The flowers are larger, more double and the variety of colors is infinitely greater. The plants grow about 15 inches high, flowers always erect. If taken up in the Fall the plants bloom all winter. Pkt., 100 seeds, **8c.**, 4 pkts. for **25c.**

EVER-BLOOMING CHABAUD CARNATION.

"TREASURE VINE."

(*Childsia Wercklei.*)

A plant, entirely unknown to science until discovered recently by Mr. Carlo Werckle, in the mountain regions of Costa Rica. It is a beautiful climbing composite, suitable for cool, shady windows or verandas. While it will grow to the height of 10 feet, it blooms profusely when very small, its flowers being like a **clematis** in shape but intense **scarlet** in color, which, added to the beauty of its foliage and natural grace of growth, makes one of the most elegant flowering plants ever seen. It is a quick, robust grower, and so hardy and vigorous that it will stand any amount of abuse. Specimens sent to the Royal Botanic Gardens at Kew attracted great attention, and it has been decided to call it Treasure Vine on account of its great value.

Fine plants, **25c.** each; 3 for **60c.**; 5 for **\$1.00.**

THE "ARBUSUS," or MAYFLOWER VERBENA.

RUSSELLIA ELEGANTISSIMA. (New.)

A very striking semi-trailing plant, especially adapted for hanging baskets, vases, or window boxes, where a delicate, graceful effect is sought. The plant is skeleton-like in growth, throwing long spikes of rush-like branching foliage, 2 to 3 feet long, which are literally covered with brilliant coral-red florets. Well-grown plants, 3 to 4 feet in diameter, look like a shower of delicate coral blossoms. Strong plants, **15c.**; 3 for **40c.**

**TECOMA SMITHII.**

The new dwarf or bushy Trumpet Creeper is one of the sensational novelties of the season. It blooms nearly the whole year round. **SWAINSONIA WHITE.**

This plant has been grown extensively the last four or five years by the florists as a cut flower; in fact, nothing is more beautiful than the graceful sprays loaded from tip to base with large, pure, white, waxy, sweet-pea-like flowers, enscathed among the beautiful green acacia-like foliage. The plant is easy to grow, begins to flower when very small, and is in flower nearly the year around, for winter or summer, inside or out, it is at home. Grows quick from seed.

Pkt. Seed, 10c. Plants, 15c. each; 2 for 25c.

**MEXICAN PRIMROSE.****It is Strictly a Perpetual Bloomer,**

As it is in flower at all times of the year, a good specimen showing from 10 to 30 large saucer-shaped blossoms about 3 inches across, superb colors and beautiful form. As a plant for hanging basket or pot it is unexcelled. Each blossom keeps perfect many days before fading, and when it drops others are out to take its place. The plant is a free grower, succeeding in any soil or situation, and commencing to bloom almost as soon as the cuttings are potted. As a window plant it combines great hardiness and ease of culture. In the open ground it grows freely and blooms profusely.

FAIRY ROSE SEED.

(*Rosa Multiflora nana Perpetua.*)

This is the true New Hardy Hybrid Perpetual, Ever-Blooming Rose, which will surely blossom in 60 days. I have a photograph of a plant in flower 28 days from sowing the seed. This variety is entirely new and very expensive, and must not be confounded with seed sold as "**Polyantha**" or "**Multiflora**" which simply means "many flowered" and will not bloom under four to six months, and altogether inferior in every way. These roses are a wonderful freak of nature. These **sturdy little Midgets** start to flower in babyhood **two months from seed**. They flower on little shoots **3 inches high**. With age the flowers increase in size and number, until large trusses of bloom cover the plant from spring until frost, when the flower trusses are closely followed by clusters of bright red hips or seed pods. They are **hardy and live from year to year, increasing in beauty and perfection each year**. The flowers come double, semi-double, in many colors, **white, pink and crimson**.

Pkt., 3 capsules, 20 feeds, with "Jadoo" for sowing, 15c.

Pkt., **Multiflora**, or **Polyantha** Rose Seed, 50 seeds, 3c.

BABY PRIMROSE.
(*Primula Forbesi*.)

Last spring this plant became quite famous and was much used in very elegant and handsome decorations as sprays of cut flowers and plants for table and mantel. It gives a peculiar dainty and handsome effect to bouquets and baskets, and is of great value in all really artistic decorations.

Why you should grow the Baby Primrose.

Plants begin to bloom when only one inch high.
Plants in 2 inch pots 3 months ago, now in 6 inch, carry more than 50 sprays of flowers, and will continue to bloom in greater profusion. It's a perpetual bloomer.
The flowers remain fresh nearly a month after being cut.
The stems are long and erect, hence useful for all purposes.
The rosy-lilac flowers are just the right color for all purposes.
For Easter blooming nothing could be more desirable.
The more you cut it the more it blooms.
It is elegant as a pot plant or for jardinières.

NEW LILLIPUT

FANCY CLIMBING

NASTURTIIUMS

New Dwarf Nasturtium "CHAMELEON."

This is the most unique and beautiful variety of Nasturtium ever raised. One plant produces as many differently colored flowers as a dozen plants of the ordinary kinds. Nearly every flower on a plant is different; they are large and very beautiful. This is one of the best and most charming novelties we have had in years. I import my seed of this Nasturtium from France, and from the firm who originated the plant.

Pkt. 6c.; oz. 20c.; $\frac{1}{4}$ -lb. 50c.

New Tall Nasturtium "CHAMELEON."

This variety was raised at the same time as the Dwarf; it is exactly the same, only it is a climber or trailing sort. It is absolutely new, and is very fine. It should be tried by all.

Pkt. 6c.; oz. 15c.; $\frac{1}{4}$ -lb. 40c.

"Special Mixture" of DWARF NASTURTIIUMS.

Dwarf Nasturtiums are most admirably adapted to beds and borders in every garden. Their low, neat, even, bush-like growth, the abundance of their flowers in their endless variety of colors, their long season of bloom—from June until late in the Fall—and the little care that they require make them really the "busy man's flower." My *Special Mixture* of Dwarf Nasturtiums will give a larger variety of colors in even proportions than any other Nasturtium Mixture, for it is put up by myself from named sorts, and also contains a large share of the new *Lilliput Nasturtium*, and of the "*Dwarf Chameleon*," which is in the Dwarf Collection what the "*Mad. Gunther*" is in the Tall—the richest and most varied combination of colors ever produced, showing odd colors hitherto unknown among flowers.

Price per large pkt. 10c.; oz. 15c.; 2 ozs. 25c.; $\frac{1}{4}$ lb. 45c.; $\frac{1}{2}$ lb. \$1.50.

New Hybrid Nasturtium "LADY GUNTHER."

(Trailing or Climbing.)

This is the Giant flowered Nasturtium. The flowers are larger than any others, the colors are much brighter and richer, more varied in shades and more beautiful in every way.

For richness and variety of colors these new hybrids have no equals among Nasturtiums. There are shades of rose, salmon, brightest red, pale yellow, either as self colors or spotted and striped. The foliage is mostly dark and contrasts very effectively with the rich colors. They are climbers and free and continuous bloomers. Pkt., 25 seeds, 5c.; oz. 15c.

PARISIAN FANCY PANSY.

THE NEW PANSY-VIOLET.

(Tufted Pansies.)

These new Pansies are called "**Tufted**" because a plant from a single seed will grow and enlarge into a clump or **tuft** of plants, which will live and bloom year after year, and send out "**runners**" like the Violet; hence the name **Pansy-Violet**. They are **hardy perennial** plant, living out all winter, increasing and blooming continuously. They are **sweet-scented**, like the Violet. The flowers are very large and of great substance, measuring $2\frac{1}{4}$ to $2\frac{3}{4}$

inches across. The colors are marvelous and endless in variety. Dark and bright, also delicate shades, zoned, pencilled and mottled in wondrous colors. And added to all this, a hardy perennial violet perfumed **Pansy**, increasing in size and numbers each year. Once planted—always "A thing of beauty, a joy forever." While in Europe I was surprised at the interest and enthusiasm this new plant was creating. In Edinburgh I attended an exhibition devoted exclusively to this plant. This seed is of the very finest quality from the most reliable sources. Pkt., 100 seeds, **10c.**; 3 pkts., **25c.**

Frost-proof foliage plants, resisting all effects of frosts or freezing for six weeks after most plants are killed. Start the seed early in pots, boxes, or hotbeds, and you will have an elegant display early and until November 20. Plant in rich, well worked soil. The leaves of some varieties grow over 3 feet long and 1 foot wide. They display the greatest range of color, from silvery white to deep blood crimson. They may be classed among our most valuable bedding and decorative plants.

When planted as an edging to beds of sub-tropical plants of taller growth, such as Cannas, Ricinus, etc., they are very effective, and nothing can exceed a group of them for brilliancy and effect. They are also equally as effective planted in the center of lower growing plants. As a background of center of a Begonia bed they are most beautiful.

1 Pkt. each of the 10 named kinds on this page for 40c.

These new hybrids originated in California. They bloom from **one to two months** sooner than the ordinary kinds.

These giant flowers are surpassingly beautiful, measuring $4\frac{1}{2}$ to 5 inches across. Some are shaped like single Camellias, but larger and more beautiful; some of the crimson ones could almost be taken for single Dahlias; white ones have plaited petals, prettily fringed, resembling the California Tree Poppy. The petals are plain in some flowers; in others pinked, toothed, or fringed, and beautifully overlapping. Colors range from pure white through shades of pink and red. The latter are dark rich shades of red, shades heretofore unknown in Cosmos. Some white ones are delicately flushed or flecked with pink or mauve, and very beautiful flowers in pink and mauve have a dark red ring around the eye. The daintiest, white, pink, and flushed, have laciniated petals, fringed to the center of the flower, and resemble Marguerites, but are more beautiful and esthetic. The giant white are especially handsome, with very large, broad petals; flowers of great substance, almost as chaste and lovely as lilies. Tests, the past summer, does not bear this statement out. It is not so early by over 3 months as was claimed for it. Still the size and color of the flowers are most beautiful.

NEW DWARF GOLDEN YELLOW FLOWERING EUPH.

It is a low growing, branching plant; every branch and branchlet ending in racemes six to ten inches long, of these beautiful golden Sweet Pea like flowers. The oval leaves are smooth, of the darkest green, and the flowers are followed by clusters of short smooth pods, in which, when shaken, the seeds sound like a child's rattle. It is best to start the seeds in the window or hot-bed, first soaking them in luke-warm water for about twelve hours.

The flowers of these New Mammoth Morning Glories are as large as moonflowers, often 6 inches across, and the petals of many are beautifully fringed and ruffled. The vines begin to bloom when 2 to 3 feet high and continue to bear flowers by the hundreds until frost. The flowers are not only large but superior in every way to the common kind. The petals are thicker, which gives the colors a deeper and richer look. The flowers are strangely and beautifully marked and colored in a way never seen before. Snowy throats with blood-red border, velvet plum bordered with white, snow-white through all possible shades of blue, and of red from palest pink to darkest reds and purples. They are streaked, mottled, striped, marbled and bordered in a wonderful fashion, and sometimes show rare shadings of ash gray, bronze, brown and slate-blue, colors rarely found in any other flowers. Bending and trembling with lifelike beauty, the surface is a perfect shimmer of light and color. The colors are blended in the most beautiful and showy fashion, and include almost every shade, from satiny-white, pale rose, to the most dazzling crimson-scarlet, blotched and variegated in many styles.

NEW ANNUAL GLOXINIA FLOWERED PENTSTEMON.

Not only are they distinct as an annual, but, in point of size of flowers (individual flowers measuring 2 inches across), variety and brilliancy of color and profusion of bloom, it altogether eclipses the perennial form. It has been named because of the resemblance of the flowers to Gloxinias in their substance, form and variety of coloring. Sown early they come into flower in July and continue a blaze until frost. Pkt., 100 seeds, **8c.**; 3 for **20c.**

NEW SINGLE PETUNIA, SNOWBALL.

BIRD OF PARADISE. (Poinciana Gilliesi.)

The flowers of this rare plant are of a rich golden yellow, measure two and one-half inches across, and are produced in very large trusses. The most attractive part of the flower is the large pistils, which are spread out in fan-like form, and are of a beautiful, bright crimson color. The foliage is highly decorative, similar to a very delicate Acacia. If the seed is started early, it will produce a profusion of blooms the first year. Pkt. 10c.

Pkt., 25 seeds, **10c.**

SALVIA FARINACEA.

The Silver Sage.

It appears to run altogether to flower, hundreds upon hundreds of tall spikes of Silvery Lavender blooms rising from a dense mass of foliage during the entire season. Far handsomer is it indeed than most any bedding plant we know of—there being none of this color grown. As isolated specimens it is also very showy. Its long lasting and the graceful sprays were greatly admired when shown at our last Exhibition. Pkt., 50 seeds, **5c.**

WHITE SALVIA.

A beautiful new kind having milk-white spikes of flowers, making a beautiful contrast with Red, White and Blue. Pkt., 50 seeds, **5c.**

NEW SALPIGLOSSIS, "EMPEROR."

The Salpiglossis is one of the greatest favorites among annuals. It holds this high place because of the ease with which it is grown, the beauty of its almost orchid-like flowers, and its continuous habit of blooming, the flowers being produced during the whole summer. This new variety shows marked distinctions in both its flowers and habit, whether seen at a distance or examined closely. It forms only one leading stem, which often grows as thick as one's finger and bears on its end a bouquet of the most beautiful flowers. Every one of them is richly veined with **gold**, and they are much larger than those of the old type. There is as much difference between the "Emperor" variety and the old type as there is between the improved varieties of petunias and the common petunias. In short, this novelty is so remarkably beautiful that experts both in this country and abroad pronounce it something really extraordinary. Pkt., 150 seeds, **8c.**

SALPIGLOSSIS GRANDIFLORA.

ZINNIA, MEXICANA HYBRID MIXED.

A new hybrid strain issued from *Z. Mexicana*, from which it differs not only in the shape and color of the flowers, but also in the dwarf size and more bushy habit of the plants. The flowers are single or semi-double and in shape they resemble much more those of the *Coreopsis* or *Gaillardias* than those of the old form of *Z. Mexicana*; they are very numerous and remarkably varied in color; some shades are exceedingly rich and contrast strikingly on the dark green foliage.

ZINNIA, MEXICANA HYBRID MIXED.

**ACALYPHA SANDERI.** (Philippine Medusa.)

This was the only real bona fide novelty in plants last spring. It is a most sensational plant when grown properly, and the oddest plant ever seen. I have seen the crimson scarlet blooms over two feet long, drooping gracefully all around the plant. It is somewhat sensitive to cold, and only reaches perfection when grown and kept in a warm place. Some of my customers who bought this plant last spring, report that it bloomed finely planted out side, that the tendrils were long and highly colored. Good strong plants **25c.** each, **5** for **\$1.00.**

**FRAGRANT CLERODENDRON.**

Is a bold-looking plant of good habit, producing dense heads of rosy white jessamine-scented flowers, remaining perfect a long while, and forming a bouquet of their own. A plant that will please you. Distinct. **15 cents.**

**ANTIGONON — MOUNTAIN ROSE.**

This plant has been exploited by a prominent firm of florists until one would think it was the plant of plants; it is a good, even a grand, plant; but requires some time to come to perfection, and as far north as this the roots will need some protection thrown over them in shape of leaves, boughs or coarse manure.

Numberless clusters of deep pink blossoms so completely cover the vine as to almost hide the foliage. Grand and effective.

NEW WEeping LANTANA.

The most beautiful basket plant ever grown.

Record of one plant—Planted in an ordinary nail keg in May, was in flower all the time till August, when it had five hundred and ninety clusters of flowers, continued in full flower (removed to a greenhouse in October) to December, when three hundred and fifty clusters were counted. At this time every young branch was cut off to propagate, but on January 14th, it had one hundred beautiful new clusters. The plant has a most graceful drooping habit, grows rapidly, and blooms persistently winter and summer, producing a cluster of flowers **at each leaf.** Color, most delicate, clear, brilliant, rosy lilac; foliage, bright dark green. Does equally well in winter or summer.

15c. each, **2** for **25c.**

THE EVERBLOOMING PANSY GERANIUM.

This is an everblooming Lady Washington Geranium, a plant that is highly prized by every one. The ordinary kinds bloom only once during the year, while this plant is covered with flowers most of the time—winter and summer. The striking looking flowers literally cover the plant. The flowers are a rich plum purple, sometimes almost black, while the lower petals are rosy pink and white, almost exactly like the **Pansy**—a very beautiful window plant.

**NEW WEeping LANTANA.**

Careful trials put it beyond the least question of doubt that these famous roses stand at the top of the list as the best Bedding Roses. The most admired ornamentation on our grounds the past season was a bed of these Roses. The large handsome flowers were produced in such amazing numbers as to make the bed a solid sheet of bloom. Plant a bed of these Roses and you will never have cause to regret it.

THEY BLOOM CONTINUOUSLY THROUGH THE ENTIRE SUMMER.

NEW YELLOW SOUPERT "MOSELLA."

Has the genuine dwarf-growing, free-flowering Soupert habit; produces beautiful clusters of very double, ball-shaped flowers which open like a Camellia. The buds are also very pretty. The color is a white tint on beautiful light yellow ground. Each, 15c.; 2 for 25c.

CLOTILDE SOUPERT

Is a cross of the free-blooming Polyantha Rose and a large flowered Tea, thus giving it, with all the free-blooming qualities of the former, the strongest growth of the Tea class. Its color is charming, shading from pearly white to purest rose, double blossoms, delightful fragrance, wonderful vigor and freedom of bloom.

Each, 15c.; 2 for 25c.

"PINK SOUPERT."

This bright, new Rose is a very free-flowering variety, much resembling Hermosa, but more double and flowering more freely; it shows the Polyantha blood in the full cluster of bloom, and it makes a handsome contrast, bedded or grown with the C. Soupert.

Each, 15c.; 2 for 25c.

1 Each of the 3 Kinds, 30c.

THREE MAGNIFICENT HARDY CLIMBING ROSES.

Crimson Rambler is the most phenomenal Rose ever raised; single plants have had 6,000 flowers on in a season.

EXCELSIOR PEARL TUBEROSES.

These are the best of all Tuberozes to plant. They are dwarfs, and the immense spike stands erect, covered almost to the foliage with very large double flowers, sometimes as many as 50 on a spike.

Large bulbs, sure to bloom, 5c. each; 40c. per dozen; \$2 per 100, by express.

Extra large bulbs, 6c. each; 50c. per dozen; \$3 per 100, by express.

HOW TO PLANT.

Set out about the time you do Coleus, in rich, warm soil. Firm the soil around the bottom of the bulb with your hand, and have the top of the bulb just covered with dirt. When the flowers begin to open, if you take the plant up and put it in a pot or box and place it on the piazza or out of the sun and storms all the flowers will open very white and full.

NEW VARIEGATED TUBEROSE.

This scarce variety has been neglected because it has been so high in price. Few have ever grown, and not many people have ever seen it. It is a plant of superior excellence, and I have put the price within the reach of all. The leaves are bordered with a conspicuous white band, making it a beautiful border plant. Flowers single, large white, delicious fragrance, but not nearly so

heavy as the double sort. The spike is graceful and is much more beautiful when cut than the other kinds. Blooms easier and three weeks earlier than the doubles. The bulbs bloom year after year, while the others do not.

Price fine-blooming bulbs, **5c. each; 3 for 12c.; 7 for 25c.** By express, 50 for **\$1.50; 100 for \$2.**

NEW TWICE BEARING FRENCH STRAWBERRY,

ST. JOSEPH.

This new berry is of excellent flavor, dark red in color, large size and firm, but its leading characteristic is its strong tendency to bear two full crops in a season. Indeed its tendency is to keep throwing up flower stems from May to Autumn, but it is better after taking off the Spring crop to pinch off the blossoms and you will get a heavy Fall crop. Plants **10c.; 3 for 25c.; \$1.00 a doz.**

BEGONIA.

Grandiflora Erecta Cristata (Bearded Begonia).

The flowers are single, of good size, and extremely varied in color, some beautiful and rare shades of copper color being found amongst them. The remarkable feature, however, is that on each petal a miniature forest has grown, composed of curiously-twisted threads, forming near the center of the flower a dense crest or beard, giving the flower a very gay and puzzling aspect. Very ornamental and highly interesting.

Prices of Bulbs, 25c. each; 5 for \$1.00.

BEGONIA DUKE ZEPPELIN.

This is undoubtedly the most gorgeous summer flowering tuberous plant (Begonia) ever produced, and elicits exclamations of delight from every one who had the good fortune to see a mass of 1,000 plants which bloomed for us out of doors from May until October. The waxy, glowing scarlet flowers, as double as Camellias, completely hide the foliage from view, so that at a distance only a solid mass of blooms can be seen. It stands the sun better than any Begonia we know of, and cannot fail to become a standard bedding plant, and blooms also well in winter.

Strong Bulbs, 25c. each; 5 for \$1.00.

NEW FRILLED TUBEROUS-ROOTED BEGONIA.

A most unique form, with very large single flowers, which are entirely distinct from anything heretofore offered, the petals being wavy and beautifully frilled on the edges, similar to the newer forms of Petunias.

30c. each; \$3.00 per dozen.

1 Each of the 3 Kinds, Cristata, Zeppelin and Frilled, 75c.

Begonia Duke Zeppelin.
